

Terry Holden, a physical therapist working for Children with Special Health Care Needs, has invited Dallin Chambers to present an in-service about Head-shaping Helmets.

Dallin has given us permission to audio tape the call so that those who cannot attend or listen by phone can hear the presentation at another time and can also have access to the power point presentation.

You can go to [www.utahbabywatch.org](http://www.utahbabywatch.org) and double click on “Agency Information” and click on “[Early Intervention Provider Network](#)” at the end of the Miscellaneous section at the bottom of the right hand column. The handouts and audio of the conference call will be there a week or two after the call.

Here is the information that you need to participate by phone or in person:

Topic: Head Shaping Helmets for Plagiocephaly/brachiocephaly
